

PYCF Environmental Policy

We have set the following objectives :-

- ♣ To use energy and water resources efficiently
- ♣ To reduce waste to a minimum and to reuse and recycle materials to the maximum.
 - ♣ To avoid and reduce air, land, water, noise and light pollution.
- ♣ To protect and enhance wildlife and the natural environment.
- ♣ To reduce the impacts from our provision and use of transport.
- ♣ To avoid and reduce our overall carbon emissions.
- ♣ To ensure the best possible environmental practices in the way we buy goods and services.
- ♣ To comply with all relevant environmental legislation now and in the future

To achieve these objectives we will:-

Recycle our waste using recycle boxes.

Be mindful of the natural environment in our activities and link with Plant Purbeck, National Trust etc to further our knowledge.

We seek work and activities near to our locality and minimise travel. We also promote services being in our hub to reduce travel for people in Purbeck.

We have audited our carbon emissions and explore ways to reduce it.

We print double sided when necessary to print.

We try not to use single use plastic.

We try to shop locally and take refillable bottles etc when able.

We support young people's voice in The Dorset Children, Young People and Family plan about looking after our local area.
